

IEEE ICNSC 2021 Program

Dec. 4 (13:30-17:50)			
Smart Systems(1)			
Time	Speaker	Title	Paper ID
13:30-13:50	Jing Bi , Beijing University of Technology	An Adaptive Hybrid Bat Algorithm with Genetic Operations and Dynamic Inertia Weight	9
13:50-14:10	Yan Qiao , Macau University of Science and Technology	A Virtual Wafer-based Scheduling Method for Dual-arm Cluster Tools with Chamber Cleaning Requirements	13
14:10-14:30	Wentai Shao , Fuzhou University	Optimized Formation Control for a Class of Second-Order Multi-Agent Systems Based on Single Critic Reinforcement Learning Method	73
14:30-14:50	Imed Kacem , Université de Lorraine	Algorithms on a variable-size rectangular interface	77
14:50-15:10	Dongdong Yue , Southeast University	Distributed Adaptive Consensus via Event-triggered Sampling: An Edge-based Method	87
15:10-15:30	Xianghu Meng , Anhui University of Technology	A Dynamic VRP with Varying Transportation Costs and Its Solution Strategy	104
15:30-15:50	Coffee Breake		

Smart Systems(2)			
15:50-16:10	Xin Liang , Xidian University	Modeling and Analysis of Urban Traffic System Based on Colored Petri Nets	49
16:10-16:30	Jae-Min Jeong , Hallym University	Image-based Frequency Classifications for 1-Dimensional Signal Data Using DNNs	59
16:30-16:50	Cun Sun , University of Shanghai for Science and Technology	Fuzzy C-Means Clustering With Neighbor Information Constraint Using Sparse Self-Representation	67
16:50-17:10	Wenfeng Chen , Huaqiao University	Brain-Computer Interface Interaction Design Based on Fuzzy Petri Nets	86
17:10-17:30	Yassine Kebbati , University of Paris Saclay	Neural Network and ANFIS based auto-adaptive MPC for path tracking in autonomous vehicles	108
17:30-17:50	Shen Zhang , Nanjing University	Reducing Differences Between Real and Realistic Samples to Improve GANs	114

Dec. 4 (13:30-17:30)			
Intelligent and Learning Algorithms for Scheduling Problems in Industry 4.0			
Time	Speaker	Title	Paper ID
13:30-13:50	Ming Liu , Tongji University	A New Stochastic Bi-level Optimization Model for Post-disaster Relief Distribution in Sustainable Humanitarian Supply Chains with Uncertain Relief Supplies and Demands	15

13:50-14:10	Yichuan Chen , University of Tokyo	ss4: Reinforcement Learning Based Optimal Camera Placement for Depth Observation of Indoor Scenes	46
14:10-14:30	Feifeng Zheng , Donghua University	Theoretical results on single machine scheduling to minimize the number of tardy jobs with periodic maintenance	56
14:30-14:50	Feifeng Zheng , Donghua University	Overnight Charging Scheduling of Battery Electric Bus Considering Peak-to-valley Electricity Prices	58
14:50-15:10	Yushuang Hou , Qingdao University	Integrated Distributed Production and Distribution Problem for Minimizing Earliness and Tardiness Penalty	124
15:10-15:30	Coffee Breake		
Green and Intelligent Logistics and Transportation Systems			
15:30-15:50	Shan Zeng , Macau University of Science and Technology	Minimization of Product Transportation and Temporary Storage Costs for Home Appliances Manufacturing Factories	14
15:50-16:10	Baoqing Yan , Fuzhou University	Optimal design of reserved lanes for automated truck considering user equilibrium	17
16:10-16:30	Mingyan Bai , University of Electronic Science and Technology of China	A Data-Driven Near-Optimization Approach for Smart Parking Management Platforms	88
16:30-16:50	Ziwen Li , Anhui University of Technology	Ant Colony Optimization for Heterogeneous GVRP with Customers Service Restrictions	105
16:50-17:10	Saifei Chen , Macau University of Science and Technology	A Partitioning Algorithm for Bi-modal Road Networks	123
17:10-17:30	Yuhuan Wang , Fuzhou University	A fast tabu search algorithm for the emergency rout planning for forest fires with priority level	139

Dec. 4 (13:30-17:30)**Petri Nets and Artificial Intelligence**

Time	Speaker	Title	
13:30-13:50	Wenyan Hou , Huaqiao University	Fault identification of DES using Petri net	47
13:50-14:10	Yingjie Li , Xidian University	Optimal Input Calculation and Control for a Class of Timed Petri Nets under Marking Constraints	52
14:10-14:30	Hongxia Gao , Xi'an University of Science and Technology	Trustworthiness Evaluation of Smart Grids Using GSPN	55
14:30-14:50	Hongbin Zhang , Huaqiao University	Dispatching and Path Planning of Automated Guided Vehicles based on Petri Nets and Deep Reinforcement Learning	83
14:50-15:10	Kaicheng Tan , Huaqiao University	Colored Knowledge Petri Nets and Logical Inference	90
15:10-15:30	Coffee Breake		
Advances in Hybrid Model-Data-based Control Approaches in the Future Challenging Aerospace Problems			
15:30-15:50	Nan Peng , Southeast University	Sliding mode control with disturbance compensation for nanomanipulation system based on inverse system decoupling algorithm	22
15:50-16:10	Yibo Tu , Huaqiao University	Research on Contact Force Tracking of Robotic Manipulators Based on Active Disturbance Rejection Control	84

16:10-16:30	Wang-Xiang He , Huaqiao University	Adaptive active disturbance rejection control design for uncertain control input gain	96
16:30-16:50	Wojciech Stróżecki , IBISC, Université d'Evry Paris-Saclay	Neurally Optimized Model Predictive Control for Autonomous Landing of a UAV on a moving platform	98
16:50-17:10	Xi Luo , Huaqiao University	Research on UAV Multi-Object Tracking Based on Deep Learning	101
17:10-17:30	Heran Li , Huaqiao University	Double Loop DR-PID Control of A Rotary Inverted Pendulum	138

Dec. 4 (13:30-17:30)

Applying OR and AI for Solving Decision Problems in Industry 4.0

Time	Speaker	Title	Paper ID
13:30-13:50	Imed Kacem , LCOMS - Université de Lorraine	Minimizing the Maximum Lateness for Scheduling with Release Times and Job Rejection	79
13:50-14:10	Guolin Hu , Jiangxi University of Science and Technology	Investigation on the Optimization Method of Polygonal Line Loading Path for Tube Hydroforming with Radial Crushing	26
14:10-14:30	Tianqi Huang , Xidian University	SS1: ROS Based Obstacle Avoidance Motion Planning of UR5 Manipulator	39
14:30-14:50	Yosra Makhoulouf , Université de Lorraine	Two-stage no-wait hybrid flow shop scheduling with inter-stage flexibility: A mathematical model	81

14:50-15:10	Aristide Grange , UNIVERSITÉ DE LORRAINE - LCOMS	Approximate solutions for a special pagination problem with 2 symbols per tile	121
15:10-15:30	Coffee Breake		
Industry 4.0 and AI, from Theory to Industrial Case Study			
15:30-15:50	Tundong Liu , Xiamen University	Parallel 3D ICP based on conditionally constrained corresponding points and applications	8
15:50-16:10	Delong Zhang , Huaqiao University	Research on Digital Twin Model and Visualization of Power Transformer	74
16:10-16:30	Bingqi Lin , Huaqiao University	ss6 : A Multi-Feature Fusion Convolution Neural Network for Image Compression Artifacts Reduction	106
16:30-16:50	Hossein Darvishi , Norwegian University of Science and Technology	ss6: Real-Time Sensor Fault Detection, Isolation and Accommodation for Industrial Digital Twins	142
16:50-17:10	Lili Huang , Zhejiang University	Research on Container Slot Planning for Coordinated Operation of Quay Cranes and Yard Cranes	144
17:10-17:30	Jiujun Cheng , Tongji University	Accessibility for VANET in an Urban Scene	147

Dec. 5 (08:30-11:30)

Theory and Industrial Case Study in Industry 4.0

Time	Speaker	Title	Paper ID
------	---------	-------	----------

08:30-08:50	Kosuke Nishizawa , Tokyo University of Agriculture and Technology	Operator-based Nonlinear Modeling and Control of Microreactor Considering Symmetry	31
08:50-09:10	Kazuya Tonomura , Tokyo University of Agriculture and Technology	Experimental Study on Nonlinear Vibration Control for a Flat Plate with Multiple Piezoelectric Elements	32
09:10-09:30	Qi Yuan , Huaqiao University	Histogram Equalization based on Binary Optimization Model with Subjective and Objective Consistency	45
09:30-09:50	Haiqiang Mei , Nanjing University	Maintenance Operation Plan Generation Method Based on E-CARGO Model	48
09:50-10:10	Yufeng Gan , Jiangxi University of Science and Technology	Research on operating characteristics of a hot blast stove	53
10:10-10:30	Coffee Breake		
Ripple Effect Management for the Supply Chain			
10:30-10:50	Ming Liu , Tongji University	A Reinforcement Learning Variable Neighborhood Search for the Robust Dynamic Bayesian Network Optimization Problem under the Supply Chain Ripple Effect	16
10:50-11:10	Zhengchao Liu , Jiangxi University of Science and Technology	A two-stage optimization method of manufacturing service composition for personalized customers	27
11:10-11:30	Ming Liu , Tongji University	A Bayesian Network Method for Humanitarian Supply Chain Performance Evaluation	29
11:30-11:50	Libo Zhang , Southwest University	Group role assignment with a training plan	100

Dec. 5 (08:30-11:30)

Optimal Algorithms and Applications			
Time	Speaker	Title	Paper ID
08:30-08:50	Fei Ma , Tongji University	Goal-conditioned Behavioral Cloning with Prioritized Sampling	75
08:50-09:10	Lihong Dong , Xi'an University of Science and Technology	Prediction and Analysis of Time Series with the aid of Granular Parallel Support Vector Machine	110
09:10-09:30	Tao Zheng , University of Toyama	Differential Whale Optimization Algorithm	122
09:30-09:50	Meiji Cui , Tongji University	An Improved Competitive Swarm Optimizer Based on Generalized Pareto Dominance for Large-scale Multi-objective and Many-objective Problems	140
09:50-10:10	Huan Liu , Tongji University	Hierarchical Learning-based Particle Swarm Optimizer	145
10:10-10:30	Coffee Breake		
Theory and Industrial Case Study in Industrty 4.0			
10:30-10:50	Yue Su , Shandong University of Science and Technology	A Method to Quickly Determine Some Non-Reachable Markings in Cyclic Petri Nets Based on State Equation	28
10:50-11:10	Maede Zolanvari , Washington University in St. Louis	ADDAI: Anomaly Detection using Distributed AI	78
11:10-11:30	Xun Mou , Shanghai University	A new R-number Petri net model for knowledge representation and reasoning	102

11:30-11:50	Shuo Wang , Zhejiang University	A Decision-support Framework for Port Generate Container Stowage Plan	133
-------------	--	---	-----

Dec. 5 (08:30-11:30)

Monitoring, Control and Intelligent Learning for Networked Systems

Time	Speaker	Title	Paper ID
08:30-08:50	Yucong Rao , Nanjing University	Time Series Anomaly Detection Based on CEEMDAN and LSTM	6
08:50-09:10	Zhibin Li , Chongqing University of Posts and Telecommunications	Data-driven Industrial Robot Arm Calibration: A Machine Learning Perspective	20
09:10-09:30	Wanghui Xiao , Chongqing University of Posts and Telecommunications	An Improved Siamese Network Model for Handwritten Signature Verification	35
09:30-09:50	Xiaoying Zhang , University of Chinese Academy of Science	Dynamic Community Detection via Kalman Filter-Incorporated Non-negative Matrix Factorization	63
09:50-10:10	Leming Zhou , Chongqing University of Posts and Telecommunications	Chronic Disease Detection Via Non-negative Latent Feature Analysis	94
10:10-10:30	Coffee Breake		
Monitoring, Control and Intelligent Learning for Networked Systems			
10:30-10:50	Sisi Sun , Nanjing Normal University	Global Practical Tracking of Nonholonomic Systems via Sampled-Data Control	3

10:50-11:10	Diwen Xiong , Chinese Academy of Science	ss8: RoboNet: a Neural Network Based Kinematic Parameter Identification Model	95
11:10-11:30	Xuchao Gao , Fuzhou University	Improving Time Synchronization with Period Adaptation in Single Twisted Pair Ethernet	109
11:30-11:50	Liangyin Zhang , Nanjing University of Science and Technology	ss8: On the critical value for the modified algebraic Riccati inequality	119

Dec. 5 (08:30-11:30)

Intelligent and Energy-efficient Applications in Edge Computing

08:30-08:50	Jing Bi , Beijing University of Technology	Large-scale Network Traffic Prediction With LSTM and Temporal Convolutional Networks	10
08:50-09:10	Yihan Wen , Beijing University of Technology	Multi-stage PSO-based Cost Minimization for Computation Offloading in Vehicular Edge Networks	11
09:10-09:30	Zhang Shancheng , Liaoning Petrochemical University	Multi-Objective Multi-Verse Optimizer for Multi-Product Partial U-Shaped Disassembly Line Balancing Problem	12
09:30-09:50	Jing Bi , Beijing University of Technology	Chaotic Levy Whale Optimization Algorithm with Simulated Annealing and Differential Evolution	18
09:50-10:10	Jing Bi , Beijing University of Technology	Hybrid Whale Optimization Algorithm with Differential Evolution and Chaotic Map Operations	19
10:10-10:30	Coffee Breake		

Intelligent and Energy-efficient Applications in Edge Computing

10:30-10:50	Yilong Zhang , Northeast Electric Power University	The prediction model of dielectric elastomer brake based on CNN-GRU	36
10:50-11:10	Renkai Huang , Jiangxi University of Science and Technology	Design Optimization of Support Structures Based on Numerical Simulation of the Temperature Fields in Selective Laser Melting	37
11:10-11:30	Fridoon Najafi , Donghua University	ss2: HybridEI: Smartly Face Detection System in Resource Constrained Edge Environment	71
11:30-11:50	Shijie Zhang , Fuzhou University	Improving the Accuracy of Load Forecasting for Campus Buildings Based on Federated Learning	112

Dec. 5 (13:30-17:30)

Smart Car and Vehicl Control

Time	Speaker	Title	Paper ID
13:30-13:50	Naima Ait Oufroukh , IBISC, Université d'Evry Paris-Saclay	Steering Angle Actuator Efficiency Estimation for Vehicle Lateral Dynamics	118
13:50-14:10	Wojciech Stróżecki , IBISC, Université d'Evry Paris-Saclay	Automatic Tuning of MPC for Autonomous Vehicle using Bayesian Optimization	120
14:10-14:30	Xinyu Chen , Zhejiang University	A Novel Searching Method of Fringe Blocks for AGV Deadlock Avoidance	125
14:30-14:50	Xinyu Chen , Zhejiang University	A Two-Stage Congestion-Aware Routing Method for Automated Guided Vehicles in Warehouses	126

14:50-15:10	Xingkai Wang , Zhejiang University	A Hybrid Algorithm to Solve Periodic Vehicle Dispatching Problem with Heterogeneous Vehicles in Logistics Transportation	128
15:10-15:30	Coffee Breake		
Robot Systems			
15:30-15:50	Yi Huang , Shihezi University	The position control method of two joint manipulator based on sliding mode and trajectory setting algorithm of quintic polynomial interpolation	50
15:50-16:10	Tingting Xie , Huaqiao University	Nonlinear disturbance observer based sliding mode tracking control for robotic manipulators	85
16:10-16:30	Jiahui Yu , Nanjing University	A multi-sensors gesture interaction system for human-robot cooperation	113
16:30-16:50	Xingkai Wang , Zhejiang University	Research on Couped Task Allocation and Scheduling for Multi-type Robots	127
16:50-17:10	Xuefei Wu , Nanjing University	Precise Coordinated Localization for Swarm Robots via Multidimensional Scaling and Wireless Sensor Networks	137
17:10-17:30	Qingping Liu , Huaqiao University	Pseudoinverse-based Motion Planning Scheme for Robot Manipulators with Joint Physical Limits	143

Dec. 5 (13:30-17:30)

Multi-Robot Systems

Time	Speaker	Title	Paper ID
------	---------	-------	----------

13:30-13:50	Weidong Fang , Fujian University of Technology	Implementation of power battery voltage fault diagnosis system based on improved shannon entropy algorithm	60
13:50-14:10	Haoyi Niu , Zhejiang University	A new flexible multi-AGVs scheduling model with pre-waiting time in an intelligent manufacturing system	129
14:10-14:30	Haoyi Niu , Zhejiang University	A novel hierarchical charging algorithm for the AGV dispatching problem in a multi-robot system	130
14:30-14:50	Zichao Xing , Zhejiang University	A Collision Avoidance Algorithm for Idle Robots in Multi-robot System	131
14:50-15:10	Zichao Xing , Zhejiang University	Battery Charge Dispatching in Multi-robot Systems	132
15:10-15:30	Coffee Breake		
Planing and Scheduling Algorithms			
15:30-15:50	Bin Li , Guangdong University of Technology	Scheduling Single-arm Multi-cluster Tools With Regulation of Post-processing Time	42
15:50-16:10	Yeqi Sun , Nanjing University	Co-optimized Unit Commitment Based On Scenario Generation And Electric Vehicles	65
16:10-16:30	Bochra Djahel , universit� de lorraine	On The Tardiness Minimization on Single Machine	80
16:30-16:50	Zhenrui Rong , Zhejiang University	A Real Time Vehicle Scheduling Strategy in Container TerminalsTitle	134
16:50-17:10	Ligen Feng , Zhejiang University	A conflict-reducing path planning algorithm in automated warehouses	135

17:10-17:30	Xiaojie Jin , Zhejiang University	A Dynamic Joint Real-time Scheduling Strategy of Truck and Yard Crane in Container Terminals	136
-------------	--	--	-----

Dec. 5 (13:30-17:30)

Intelligent and Learning Algorithms(1)

Time	Speaker	Title	Paper ID
13:30-13:50	Zhengrong Wen , Xiamen University	Creator2Vec: Creator Feature Embedding for Deep Learning Recommender System	61
13:50-14:10	Linfeng Wu , Zhejiang zheneng technology research institute co., LTD	Research and Evaluation of Intelligent Threat Detection Under Industrial Internet	70
14:10-14:30	Xiaoxuan Xu , Nanjing University	Stock Price Prediction Based on Conditional Flows Scenario Generation	72
14:30-14:50	Yunhong Xu , Harbin Institute of Technology	Multi-agent Pathfinding with Local and Global Guidance	82
14:50-15:10	Mingfeng Liu , Chang'an University	A Regional Traffic Congestion Estimation method based on D-S Evidence Theory	97
15:10-15:30	Coffee Breake		
Intelligent and Learning Algorithms(2)			
15:30-15:50	Yikun Yang , Nanjing University	Health-aware Fast-charging Control of Lithium-Ion Battery Based on Reinforcement Learning	24

15:50-16:10	Yankui Ren , Jiangxi University of Science and Technology	Research on Identification Method of Magnetite Ore Based on Convolutional Neural Network	25
16:10-16:30	Xuebin Yue , Ritsumeikan University	Deep Learning and Image Processing Combined Organization of Shirakawa's Hand-Notated Documents on OBI Research	33
16:30-16:50	Chuyi Dai , Xidian University	Real object registration algorithm based on SURF and RANSAC	41
16:50-17:10	Yangming Zhou , Macau University of Science and Technology	Solving Colored Traveling Salesman Problem via Multi-neighborhood Simulated Annealing Search	69
17:10-17:30	Shuangquan Hu , China Jiliang University	Minimizing Completion Time of Processing and Assembly Operations Using Simulated Annealing	91

Dec. 5 (13:30-17:30)

Wirless Communications and Image Identification

Time	Speaker	Title	Paper ID
13:30-13:50	De Hui Adrian Tan , University of Glasgow	Multi-Sensor Based IoT Indoor Localization	4
13:50-14:10	Rongxian Xu , Huaqiao University	Dual Modal Meta Metric Learning for Attribute-Image Person Re-identification	44
14:10-14:30	Yiduo Tang , Huaqiao University	Normalized Neural Network for Belief Propagation LDPC Decoding	51

14:30-14:50	Shuying Zhang , Huaqiao University	Blind Recognition of Channel Coding Based on CNN-BLSTM	64
14:50-15:10	Yang Cao , Tongji University	Improved PolarMask with Attention for Instance Segmentation	76
15:10-15:30	Lisha Peng , Nanjing University	Threat assessment for aerial targets based on three-way multi-criteria decision making	21
